

CIA AGENT HANDLES NATO BUSINESS ON CYPRUS

[Article; East Berlin, Neues Deutschland, German, 7 April 1972, p 6 7

Georgios Theodoros Grivas - this man is the key figure in the continuing imperialist plot against Cyprus. This 74-year-old Greek chauvinist native of Cyprus is simultaneously an agent of the British intelligence service, of the CIA, and "liaison officer" of Greek and Turkish military dictators. During World War ~~Two~~ <sup>II</sup> he was a generalstaff officer in Greece where, after the defeat of the Greek army, he founded the secret organization "X" which specialized in the struggle against antifascist partisans.

After World War ~~Two~~ <sup>II</sup> Grivas offered the services of his secret organization to monopolies and military men at a time when all means (including the open murder of tens of thousands of democrats - primarily communists) were being employed to prevent the establishment of a democratic system of government in Greece. When in April 1955 the Cypriot people rose up against foreign domination by Great Britain, Grivas reappeared on the island and helped the British in his own way. He founded the so-called liberation movement EOKA which terrorized democratic elements and which, by means of prearranged criminal acts, repeatedly provided the occupation forces with pretexts for extremely brutal measures.

Such services continued in 1963/64, when imperialist-incited political and socioeconomic differences between the two groups on Cyprus (Cyprus is 82 percent Greek and 18 percent Turkish) increased to the proportions of a civil war. Grivas was again actively involved and solicited the cooperation of the command of the Cypriot National Guard. He used this force in November 1967 in his attempt by means of a coup to force the government in Nicosia to the "enosis" line (the union of Cyprus with the Greece of the Athenian black military leaders). The foul plot failed under the pressure of the enraged world public. Grivas disappeared from the Mediterranean island and waited for "his hour," which he now believes to have arrived.

For the past half year he has been on Cyprus where he, under the orders of the fascist Athenian junta and of Turkish military men, leads his band of murderers, armed with NATO weapons, to commit terrorist acts and to prepare the overthrow of the Makarios regime. This is the essence of the "Lisbon Plan" of the June 1971 NATO Council meeting. At Washington's urging Athens and Ankara came to an agreement in this plan as to how efforts would be coordinated to transform Cyprus into a battlefield for imperialist war efforts. Thus General Grivas can remain true to his political style as well as to the objective of his taskmasters: the retention of great British (read NATO) strongholds for the realization of strategic world goals.

Peace-loving elements on Cyprus realize the danger which Grivas, his subordinates, and financiers represent. Therefore they lend impressive active support to the anti-imperialist Makarios regime.

CIA SUPPLIES ISRAEL WITH MILITARY INFORMATION

Excerpt of article by Tadeusz Bartkowski; "The United State's Near East Policy;" Warsaw, Nowe Drogi, Polish, No 4, April 1972, pp 105-116

The American intelligence agency (CIA) supplies the Israelis information on the military situation in Arab countries. For several months prior to the Israeli attack on Arab countries in 1967 the CIA supplied Israel, among other things, with detailed information on the deployment of military airfields and combat aircraft in Egypt. This helped the Israeli aggressors to an enormous degree in conducting effective attacks on military objects of Arab countries.
